The Phenix mechanical keyboard from Savio combines great build quality with user comfort, making it an ideal choice for gamers. The product offers a wide range of functions and high compatibility with operating systems and hardware. The keyboard features an 82-key layout. This makes it a compact option, ideal for both office work and gaming. The Phenix wireless keyboard's keycaps are made of ABS plastic with double injection technology. This ensures durability and a remarkable appearance. Phenix comes with dedicated software, allowing you to customize functions, lighting effects, and other button settings to make the keyboard perfectly tailored to your individual needs.
