Lanview Cat5e Unshielded PE cables are manufactured and tested to the ISO/IEC 11801, EIA/TIA 568B and EN50173-2 standards. and can be used for outdoor installations, Each cable consists of 4x2 color coded PE insulated conductors.

This is currently the most common and basic method of cable construction, consisting of pairs of wires twisted together.

The cable has no shielding, instead the symmetrical twist in the wires create a balanced transmission line, helping to reduce electrical noise and EMI.
